

Technical Data

Pilot Door Air Blower AS350/H125

The certified solution to avoid condensation in the pilot door window

Purpose / Description

The pilot door air blower is developed to avoid moisture on the pilot door window. The system is mainly dedicated to sling load operations to ensure the pilot good visibility through the pilot door in all environmental conditions.

Details

- Installation compatible with Sicma seats type 159 and 198
- Air blower switched ON/OFF via a dedicated switch on the cockpit center console
- Bayonet type connector for the power supply
- System is protected by a dedicated CB
- Engineered from customer experience

Approval type	Reference Nr.	Authority	Aircraft approved
■ Minor change	2022011	EASA	AS350 B3

Further approvals

- Approval recognized by FAA, TCCA and ANAC via bilateral agreement. Approval can be validated to other civil aviation authority and extended to other aircraft on request.
